This platform aims to gather institutes and stakeholders working to the use, development and validation of analytical methods for the feed sector. The Website (www.feedsafety.org) provides an overview of all major feed safety issues, viz. animal by-products, feed additives, banned additives, GMOs, veterinary drugs, botanical impurities, mycotoxins, heavy metals and dioxins. It includes aspects on legislation, analytical methods, available tools and publication libraries. This website also offers links to European and national projects related to feed.

A public website to disseminate information on feed safety
feedsafety.org

To display your research projects

- STRATFEED
- SIMBAG FEED
- SAFEED-PAP
- FEEDINGS FATS SAFETY
- TAMPER-PROOF FEED SAMPLER
- FEED for HEALTH
- CONFIDENCE
